

Have you used an Engenuics product in a unique way that you'd like to share? Have you written an ingenious piece of code that makes an Engenuics product do something amazing? If so, we will pay you \$50 for submitting your work so it can be profiled on the Engenuics website and Facebook page.

Submission Requirements

The following elements **MUST** be included in your design submission:

- ✓ Your full name, email address and mailing address to send your cheque (we will not use any of your personal information for anything else!).
- ✓ A brief write-up (maximum 1000 words) of the design including the Engenuics products used
- ✓ At least 6 digital pictures of the design including top, bottom and side views as well as the design operating and/or pictures of users interacting with the design. Please include a photo of yourself with what you have created. Selfies are ok, but consider having someone take a good picture on your behalf!
- ✓ A video of the design in action in .mp4 or .avi format. The more produced the better – a great way to market yourself!
- ✓ Source code on GitHub (unless you feel it is proprietary)

You may optionally include:

- ✓ Unique drawings or schematics
- ✓ Any other relevant information

All submissions should be zipped and sent to info@engenuics.com using WeTransfer (free - www.wetransfer.com). There is no deadline for this contest – entries may be submitted at any time.

Rules

All entries are subject to review before being approved for the award. By submitting the design, you agree to allow Engenuics to publically display the material you have submitted online or in print. Engenuics reserves the right to decline any entry that is deemed inappropriate for this program or not unique. Engenuics will not sell your design. If a sales opportunity becomes available, Engenuics will contact you to determine if you would like to enter into a sales agreement for your device/idea/product.
